

## DIN Mounting Rail Strain Gauge Amplifier

Type GM 40

- For Switch Cabinet Assembly, Width only 23 mm
- Direct Connection to PLC
- 10...30 V DC Supply, Galvanically Separated
- Easy Operation
- Output for Voltage and Current

**DESCRIPTION:**

The DIN Mounting Rail Amplifier GM 40 amplifies the signals of SG sensors to conforming to standards output signals.

The narrow housing shape allows space-saving mounting near the sensors in switch cabinets on standardized DIN mounting rails.

A galvanically separated supply voltage range of 10...30 V and the analog outputs of 0...±5 / ±10 V resp. optional current output allow the direct signal processing with a PLC-Control.

All control elements are obtainable behind a detachable plexiglass panel on the front side.

The sensitivity adaption of the sensor takes place on-site by a DIL-switch. Base load (tara) can be adjusted.

Simulation of nominal signal possible by control-switch.

Interference signals and transient condition of the measured signal can be alleviated with the input filter.

The fine adjustment of the amplification and the zero point as well as the filter is possible through potentiometers.
